## (54) SOLAR BATTERY MODULE

## (57)Abstract:

**PROBLEM TO BE SOLVED:** To provide the outside edge face sealing structure of a solar battery panel with an excellent moisture-resistant effect and satisfactory assembly workability in a solar battery module.

**SOLUTION:** An almost U-shaped gasket 8 to be interfit by interposing a solar battery panel 5 obtained by sealing a solar battery element 2 between a transparent cover 1 and a moisture-resistant sheet 4 by a spring function is mounted so that the outside edge part of the solar battery panel 5 can be covered. Moreover, the almost U-shaped gasket 8 is interfit into an almost U-shaped groove formed at an outer frame 6 so that the solar battery panel can be prevented from dropping by the spring.

## LEGAL STATUS

[Date of request for examination]

28.02.2003

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]
